Reg. No. [ ][ ][ ][ ][ ][ ][ ][ ][ ][ ] [14EG16]

FIRST SEMESTER B.TECH EXAMINATION, DECEMBER–2014

ENGLISH

Time: 3 Hours **Maximum Marks: 70**

Note: Answer any FIVE full questions. Choosing atleast TWO questions from each part.

PART - A

1. a. Write the synonyms for the following words along with sentences each: **04**
   - i. Besiege
   - ii. Sinister
   - iii. Blasphemy
   - iv. Zest

   b. Define active and passive voice along with two examples each. **06**

   c. Define simple and compound sentences along with one example each. **04**

2. a. Change the sentences to active voice: **04**
   - i. The town was destroyed by an earth quake.
   - ii. The lesson is being explained by the teacher.
   - iii. I have been bitten by a mosquito.
   - iv. My horse had been bought by Johnson when you met us.

   b. Explain the concept of note-taking along with its advantages and disadvantages. **05**

   c. Write a summary on any one of the book which you have read for book review. **05**

3. a. Write a letter to your parents, informing them about your preparation for the upcoming final term examination. **05**

   b. Read the given passage and answer the questions: **05**

It is to progress in the human sciences that we must look to undo the evils which have resulted from a knowledge of physical world hastily and superficially acquired by population unconscious of the changes in themselves that the new knowledge has imperative. The road to a happier world than any known in the past lies open before us if atavistic (biology) destructive passions can be kept in leash while the necessary adaptations are made. Fears are inevitable in time, but hopes are equally rational and far more likely to bear good fruit. We must learn to think rather less of the dangers to be avoided than of the good that will lie within our grasp if we can believe in it and let it dominate our thoughts. Science, whatever unpleasant consequences it may have by the way, is in its very nature a liberator of bondage to physical nature

and in time to come, a liberator from the weight of destructive passions. We are on the threshold of utter disaster or unprecedented glorious achievement. No previous age has been fraught with problems so momentous, and it is to science that we must look to for a happy future.

Questions:

i. What does science liberate from? It liberate us from
   - **a.** fears and destructive passions.
   - **b.** slavery to physical nature and from passions.
   - **c.** bondage to physical nature.
   - **d.** idealistic hopes of glorious future.

ii. Should human sciences be developed because they will
   - **a.** provide more knowledge of the physical word.
   - **b.** make us conscious of the changing world.
   - **c.** make us conscious of the changing in ourselves.
   - **d.** eliminate the destruction caused by a superficial knowledge of the physical world.

iii. If man's bestial yearning is controlled
   - **a.** the future will be tolerable.
   - **b.** the future will be brighter than the present.
   - **c.** the present will be brighter than the future.
   - **d.** the present will became tolerable.

iv. Fears and hopes according to the author
   - **a.** are closely linked with the life of modern man.
   - **b.** can bear fruit.
   - **c.** can yield good results.
   - **d.** are irrational.

v. To carve out a bright future mean should
   - **a.** analyze danger that lie ahead.
   - **b.** try to avoid dangers.
   - **c.** overcome fear and dangers.
   - **d.** cultivate a positive outlook.

c. Differentiate between Cornell method and concept method of note making. Support your answers with the format and examples. **04**

4. a. Write a brief note on the parts of speech with two examples each. **06**

b. Read the following passage and make notes using outline method. **04**

Today, with just twenty-six letters, we can write a letter to our friends or answer an examination questions. Thousands of years ago, there was no writing system at all News, knowledge and information were passed on from one person to another by word of mouth. If you ever played 'rumor clinic' where a cognate message is passed from one person to another down the chain by month, you

will understand the inefficiency of the system. Messages passed down are unreliable as the speakers may mix up or lose part of the information. The first written language was invented by the early cave man. They tied bits of animals hair together to form brushes and painted pictures on the cave wall, telling their friends about their hunts. It was after several centuries that different writing systems like the Chinese characters and hieroglyphs in Egypt were invented. The alphabetical system that we are using currently also came about only after many decades of development.

Besides alphabets, the invention of writing tools is another major transition. In olden times, the kind of writing tools used depended on the material they wrote on. For example, in the Middle East, where clay is abundant in supply, the early people used hallow reed 'pens' to carve onto the wet clay tablets. After which, these clay pieces were baked till rock hard to make the writings permanent. In ancient Egypt, Egyptians either wrote on scraped thin pieces of animal skins called 'parchment' or flattened papaya stems known as 'papyrus'. Their writing tool was a primitive kind of fountain pen – a reed with ink inside.

It was only in the 1880s, that fountain pens were invented. Before that, most people used either quill pens – sharpened bird feathers or nibbed pens, which were dipped into ink before writing. Fountain pens invented later have both plus and minus points. With tiny ink tanks in them, fountain pens are superior to quill or nibbed ones as the ink in them do not run out as quickly. The disadvantages are that sometimes, the nibs of the fountain pens may break, causing the ink to leak, staining the writers fingers.

The flaw in fountain pens has led to further investigation and the successful invention of the first 'ball point' pen by a Hungarian, Ladislao Biro. There were many people after him who tried to improve upon the appearance of his ballpoint pens. Today, 'ballpoint' pens are conveniently and widely used in the world.

c. Summarize the following passage (word limit not exceeding 250 words). **04**

The scientific and technological revolution has brought fundamental changes in the socio-economic sphere. The use of diesel engine and electricity and the beginning of the application of atomic energy have changed the modes of production. There things have led to the concentration of capital in a few hands. Great enterprises are replacing cottage industries and small firms. The working classes have certainly benefited economically. The miracle of production has necessitated the miracle of consumption. Better amenities are available at a lower cost. A man can buy anything he wants today, if he can only afford. But what kinds of men are needed today for our society? Men who can cooperate in large groups, men whose tasks are standardized, men who feel free and independent and at the same time are willing to fit in the social machine without

any friction. Modern man is faced with a sort of moral and spiritual dilemma. The crisis of values yawns before him. Today the old values are in the melting pot and the new values have not found their foothold. Man has become the automation he has contrived; he has lost ownership of himself. The discord between the development of positive science on the one hand and the dehumanization of man on the other is the worst crisis of the modern age.

Apart from the economic sphere, the socio-political sphere has not escaped this satisfaction and the congruent crisis of values. Since the Renaissance, man has been striving for individual rights and self dignity. But under the present set-up, only two types of man are found – the conditioned. The propaganda offices and the planning bureaus have almost crushed the individual self and it has resulted in the rise of the 'social self'. Due to this pressure, the personality fulfillment or its all-round development is denied to many.

PART – B

5. a. Fill in the blanks with appropriate auxiliary verbs: **05**

i. He died so that he _____ save his country.

ii. Lakshmi _____ swim faster than her brother.

iii. He told me that he _____ not help me.

iv. _____ you live long!

v. We _____ not hurry, we have got plenty of time.

b. Write a paragraph on the proverb "People who live in glass houses should not throw stones". **05**

c. Change the following compound sentences into complex sentences: **04**

i. The clown entered the circus ring and the children started clapping.

ii. You have to hurry or you will miss the bus.

iii. The battle has been won but the war isn't over yet.

iv. You have to be 18 years old or you can't vote.

6. a. Read the following passage and make notes using Cornell method: **04**

Water is the basis of all life. Every animal and every plant contains a substantial proportion of free or combined water in its body, and no kind of physiological activity is possible in which the fluid does not play an essential part. Water is of course necessary for animal life. While moisture in the soil is equally imperative for the life and growth of plants and trees. Though the quantity necessary varies enormously with the species. The conservation and utilization of water is thus fundamental for human welfare apart from artesian water the ultimate source in all cases is rain or snowfall. Much of Indian agriculture depends on seasonal rainfalls irregularity of the same. It is clear that the adoption of techniques preventing soil erosion would also help to conserve

and keep the water where it is wanted. In other words, on and in the soil, and such techniques therefore serve a double purpose. It is evident, however that in a country having only a seasonal rainfall an immense quality of rain water must be necessarily run off the ground. The collection and utilization of water is therefore of vital importance. Much of it flows down into the streams and rivers and ultimately finds its way to the sea. The harnessing of our rivers, the water of which how mostly run to waste is a great national problem which must be considered and dealt with an national lines. Closely connected with the conservation of water supplies is the problem of a forestation. The systematic planting of suitable trees in every possible or even in impossible areas and the development of what one can call civilized forests as distinguished from wild and untamed jungle is one the most urgent needs of India. Such plantation would directly and indirectly prove a source of untold wealth to the country. They would check soil erosion and conserve the rainfall of the country from flowing away to waste and would provide the necessary supplies of cheap fuel and thus stop unnecessary waste of farmyard manure.

b. Identify the parts of speech of the underlined words and write a sentence for each underlined word. **04**

i. You have to believe in <u>yourself</u> if you ever expect to be successful at something.

ii. <u>We left</u> for the mountain just before six in the morning.

iii. My friend wasn't strong enough to lift his <u>heavy</u> rucksack.

iv. We got back home late at night <u>but</u> we didn't go to sleep immediately as we were very hungry.

c. Write a letter to Mr. John Sullivan, director of the Spanish department at the language Institute of Great Britain in London, England, who has posted an ad for a Spanish instructor which was advertised in the April edition of the magazine Teaching Professional. **06**

7. a. Write a story based on the conversation given below: **06**

Sarah : Hello Jason, how are you, it's been a long time since we last met?

Jason : Oh, hi Sarah I have got a new job now and is going great. How about you?

Sarah : Not too bad.

Jason : How often do you eat at this café?

Sarah : This is my first time. My friends kept telling me the food was great, so tonight I decided to try it. What have you been up to?

Jason : I have been so busy with my new job that I have not had the time to do much else, but otherwise, me and the family are all fine.

Sarah : Well, I hope you and your family have a lovely meal.

Jason : Yes you too.

b. What are tenses? List out the three main tense. State the functions of tenses along with one example each. **04**

c. Write a paragraph based on the picture (word limit not exceeding 250 words) **04**

8. **a.** Change the sentences to Passive voice: **04**

i. Road accidents injure many people every day.

ii. Lightning struck the tree last week.

iii. The police officer is questioning the boys.

iv. At ten O' clock we shall have checked the machines.

b. Expand the paragraph given below. Word limit not exceeding 300 words: **06**

<u>Self Confidence</u>

Self confidence _____ key to success. Courage _____ roof of confidence. Courage and confidence _____ can be achieved _____ great things. Many people, talented _____ not able to achieve _____ fraction of what _____ capable of because _____ not possess courage _____ attempts made. Great loss to society. Achievement _____ success follows with courage _____ confidence and courage to try _____ success.

c. Match the following words: **04**

	A	B
i.	Writhe	**a)** Stagnation
ii.	Formidable	**b)** Chaste
iii.	Lascivious	**c)** Friendly
iv.	Upheaval	**d)** be still
