9.	**a.**	**Read through the article and answer each of the following question in a single statement:** The history of UFOs. Unidentified Flying Object (or "UFO") is a term commonly used to describe lights or shapes in the sky. It was first coined by the United States Air Force in 1952 to describe sightings of mysterious objects in the sky that could not be explained even after careful investigation. Nowadays UFOs are spotted frequently, and feature in numerous movies and TV shows. Another popular name for such an object is, "Flying Saucer," in reference to the round shape of many UFOs. The first widely publicized UFO sighting was in 1947, by a pilot called Kenneth Arnold. Following this event, public sightings of UFOs increased dramatically. Movies and TV shows began featuring visitors from outer space, arriving on earth in flying saucers. With the popularity of these images, many people claimed to have seen lights in the sky. Some experts believe that people simply think they see UFOs because of the influence of TV and movies. However, experts estimate that as little as 5% of these sightings could be called "unidentified." Usually these lights are made by aircraft, satellites, or weather balloons. Top secret air force	L-2	CO2	**2X5**

		activities during the Cold War may have been responsible for many of the UFO sightings in America and Europe. Although not actually aliens, the secretive nature of these flying objects is definitely unidentified. Another popular idea concerning UFOs concerns the role of world governments. Specifically, people believe that the US government has discovered alien life and operates a "cover-up" to hide the truth from the public. The most widely believed cover-up is that of the Roswell Incident. In July, 1947, a UFO supposedly landed in Roswell, New Mexico, and was examined and hidden by government agents. There have been many investigations into the Roswell Incident, however, these reports always claim that no such event occurred. 1. What is the purpose of this report? 2. Why are UFO sightings so controversial? 3. How do experts explain many UFO sightings? 4. What influence did the Cold War have upon UFO sightings? 5. What do many people believe happened at Roswell?

		OR			
	b.	Based on the findings of Big -5 personality traits test, Describe your Individual Personality traits.	L-3	CO3	**5X2**
11.	**a.**	On the surface, the street theatre has a close relationship with India's indigenous folk theatre, but unlike the latter, it is not primarily intended for mass amusement. In a practical sense, street theatre is a type of group drama performed outdoors, primarily on the street, on a college or university campus, at a railway station, in a market, or in slums, where a group of artists can directly interact with a large audience in order to not only entertain but also to trigger activism. John P. McHale while talking about the relationship between advocacy and street theatre mentions the following quote of a theatre artist, "I think it is extremely effective. For instance, with street theater, we call it guerrilla theater, because we use it as a guerrilla tactic. We would not forewarn before announcements of our performances. What is a guerrilla tactic? You don't announce it. Because anyone who wanted to stop that action would be able to. Another thing with doing theater as the guerrilla theater is that it maximizes disruption of the wall. We all go around with these walls around us and it's very easy to block something out. But if we have a very strong kick to it and something as unexpected as seeing theater or poetry being performed in a public place opens people, you don't expect that. It can have a greater impact on breaking through people's walls." An important part of street theatre history in India is Safdar Hashmi. Safdar Hashmi was the founding member of JANAM and an active CPI (M) leader who used street theatre for political and	L-2	CO3	**10**

		social activism. He actively criticized the problems existing in society through this art. On January 1, 1989, Safdar Hashmi was attacked during a play. His group was performing a play named Halla Bol, in Delhi, when a troupe of political goons arrived at the place and assaulted Hashmi, who died the next day in the hospital. April 12 - Hashmi's birthday – is now commemorated as National Street Theater Day to honor his contributions in the early days of street theatre and to pay tribute to him. "If street theatre has any definite tradition in India; it is the anti-imperialist tradition of our people forged during the freedom movement. In other parts of the world, it is the peoples` struggle for just social and economic order." **- Safdar Hashmi.** **Based on the excerpts of the above article, Explain the impact of Street plays have on the minds of people.**
