		OR			
	b.	Construct a formal email applying technical-specific terms.	L3	CO5	**05**
6.	**a.**	**Rewrite the following narrative paragraphs into bulleted points.** Time management is a critical skill for all students to develop. Weekly and semester timetables are an excellent way to plan a study program. Students can use them to manage their most important study, work and social commitments and to set themselves study goals. Blocks of time can then be set aside for study, reading, researching and writing. The most urgent tasks can be addressed, whilst work continues on preparing for lectures, tutorials and assignments. If time has been allocated for specific purposes, it is easier to avoid unexpected demands like phone calls, visitors and invitations. Assignments can be completed and submitted on time and to a satisfactory standard.	L3	CO5	**05**
		OR			
	b.	Summarize the following text and give a suitable title: Renewable energy sources have become a focal point in the global quest for sustainable and eco-friendly power generation. Solar energy, in particular, has gained immense popularity as a clean and inexhaustible resource. Solar panels, also known as photovoltaic cells, harness sunlight and convert it into electricity. Their widespread adoption in residential, commercial, and industrial settings has significantly reduced reliance on fossil fuels and curbing carbon emissions. The advancements in solar technology, improved efficiency, and decreasing costs have made solar energy accessible to a broader audience. The rise of solar energy signifies a pivotal shift towards a more sustainable and environmentally conscious future.	L3	CO3	**05**
7.	**a.**	Choose a movie and identify specific skills and values portrayed by the characters. How can these be applied in real-life situations?	L3	CO6	**05**
