FIFTH SEMESTER B.Tech EXAMINATION, DECEMBER-2021

HUMAN COMPUTER INTERACTION

Time: 3 Hours **Maximum Marks: 70**

Instructions:
i. Answer **FIVE** full Questions. Question number 1 and 2 are compulsory. Each question carries 14 marks.
ii. Missing data may be suitably assumed.

1.	**a.**	Illustrate the similarities and differences in human memory and computer memory.	**07**
	b.	Distinguish between short term & long term memory. State the requirements to perform cognitive walkthrough of a system?	**07**
2.	**a.**	Illustrate about navigation design through levels of interaction and screen design	**07**
	b.	Briefly discuss about the three main approaches to prototyping.	**07**
3.	**a.**	Summarize with an example of cognitive complexity theory and express production rules.	**07**
	b.	Explain effective technical and human implementation of computer-based Systems (ETHICS).	**07**
		OR	
4.	**a.**	Illustrate the linguistic approach and use of Backus-Naur Form (BNF) rules to describe the dialog grammar.	**07**
	b.	Describe the six key stages to carry out in a CUSTOM analysis?	**07**
5.	**a.**	Briefly describe the layers of the mobile ecosystem.	**07**
	b.	Define Jesse James Garrett's Elements of user experience.	**07**
		OR	
6.	**a.**	Mention the interface tools along with toolkits available.	**07**
	b.	Give in detail about mobile information architecture with a neat diagram.	**07**
7.	**a.**	Interpret the patterns that support virtual pages used in the design of rich web UI.	**07**
	b.	Write short note interactive single-page process.	**07**
		OR	
8.	**a.**	How are contextual tools used in the design of rich web UI?	**07**
	b.	Explain how to inlay the information directly within the page.	**07**
