[22HSS203]

FIFTH SEMESTER B.Tech EXAMINATION, DECEMBER-2024

RESEARCH METHODOLOGY

Time: 3 Hours **Maximum Marks: 100**

Instructions: i. Missing data may be suitably assumed.

ANSWER ALL QUESTIONS

		PART-A			5x2=10
1.	a.	Mention the primary objectives of research?	L3	CO1	02
	b.	List out the essential features of a good research design?	L2	CO2	02
	c.	Name the four types of measurement scales.	L3	CO3	02
	d.	Write down the two main types of data in research?	L1	CO4	02
	e.	Define simple regression analysis	L1	CO5	02
		PART-B			**6x5=30**
2.	a.	Explain the characteristics of a well-defined research objective, and how do they influence the research process?	L2	CO1	05
		OR			
	b.	Discuss the key steps involved in the research process.	L3	CO1	05
3.	a.	What are the common sources from which research problems can be identified?	L2	CO2	05
		OR			
	b.	Describe the different types of research designs and their applications.	L3	CO2	05
4.	a.	Write short notes on reliability and validity of measurement instruments in research	L1	CO3	05
		OR			
	b.	Describe the key scaling techniques used in research.	L3	CO3	05
5.	a.	Explain in detail about different types of data collection methods	L3	CO4	05
		OR			
	b.	Explain the difference between primary and secondary data. Provide examples for each.	L1	CO4	05
6.	a.	Explain the different types of statistical analysis in research	L5	CO5	05
		OR			
	b.	List out the types of data editing, and why is data editing necessary?	L2	CO5, CO6	05

Learning Resource Centre Jain Global Campus Ramanagara-562

7.	a.	Give your understanding of a good research design. Is single research design suitable in all research studies? If not, why?	L5	CO3	05
		OR			
	b.	Write down the criteria for good research?	L3	CO1	05
		PART-C		**6x10=60**	
8.	a.	Using a clear diagram, illustrate the sequential steps required to effectively carry out a research project	L3	CO1	10
		OR			
	b.	Describe the scientific method and its importance in conducting research.	L3	CO1	10
9.	a.	Discuss the essential elements that make a research problem well-formulated and significant?	L3	CO2	10
		OR			
	b.	Discuss the meaning of research design and describe the various types of research designs commonly used in research.	L3	CO2	10
10.	a.	Explain the techniques of developing measurement tools	L3	CO3	10
		OR			
	b.	Explain the concept of "scale construction techniques" and provide an overview of different techniques used to develop effective measurement scales.	L3	CO3	10
11.	a.	Explain the Collection of Data through Schedule method and discuss its purpose and types	L3	CO4	10
		OR			
	b.	Compare and contrast the use of questionnaires and schedules for data collection.	L2	CO4	10
12.	a.	Analyze the different types of statistical measures that are used to summarize the research data	L2	CO5	10
		OR			
	b.	Describe the measures of central tendency and discuss their importance in data analysis.	L1	CO5, CO6	10
13.	a.	Analyze why tabulation process is important and list out the rules, types and components	L5	CO4	10
		OR			
	b.	Describe the stages of data processing and their importance	L1	CO5, CO6	10
