FIFTH SEMESTER B.Tech EXAMINATION, DECEMBER-2024

ENTERPRISE INFORMATION SYSTEMS

Time: 3 Hours **Maximum Marks: 100**

Instructions: **i.** Missing data may be suitably assumed.

ANSWER ALL QUESTIONS

		PART - A			**5 x2=10**
1.	**a.**	Describe events and functions in Even driven process chain.	L2	CO1	**02**
	b.	Define Enterprise resource planning.	L1	CO1	**02**
	c.	Describe Personnel area and personnel subarea in Human resource-Enterprise structure.	L1	CO1	**02**
	d.	Describe bullwhip effect in supply chains.	L2	CO2	**02**
	e.	Define Service-Oriented Architecture (SOA).	L2	CO2	**02**
		PART - B			**6 X 5=30**
2.	**a.**	Explain the specified terms used inside SAP- client, operating concern, company code, controlling area and business area.	L1	CO2	**05**
		OR			
	b.	Consider the case study Coffee business and explain how Marketing and sales functionality can be incorporate for successful operation of the coffee shop	L2	CO2	**05**
3.	**a.**	Identify the Functional Areas and explain the Business Processes of a Very Small Business	L1	CO2	**05**
		OR			
	b.	Explain how human resource functional area exchange information with other functional area in business	L2	CO2	**05**
4.	**a.**	Define supply chain management and explain its motivation in modern businesses.	L2	CO2	**05**
		OR			
	b.	Briefly explain the role of coordination and cooperation in managing supply chains.	L3	CO2	**05**
5.	**a.**	Describe the main components of the SCOR model used in supply chain management.	L2	CO2	**05**
		OR			
	b.	How does RFID technology differ from traditional barcode systems in terms of operational efficiency?	L3	CO2	**05**

JAIN (Deemed-to-be University) Learning Resource Centre Jain Global Campus Ramanagara-562

6.	**a.**	Define RFID technology and explain its significance in supply chain management.	L2	CO2	**05**
		OR			
	b.	Briefly describe how RFID technology can improve inventory accuracy in retail settings, providing an example.	L2	CO2	**05**
7.	**a.**	Explain how *Software-as-a-Service (SaaS)* differs from traditional on-premise software solution	L2	CO2	**05**
		OR			
	b.	Describe the challenges and advantages of *cloud computing* in ERP systems.	L2	CO3	**05**
		PART - C		**6 X 10=60**	
8.	**a.**	How order fulfillment is done in business process illustrate in detail with neat diagram.	L2	CO3	**10**
		OR			
	b.	Write an organizational structure for Material Management and explain in detail.	L2	CO3	**10**
9.	**a.**	How recruitment is done in business process illustrate in detail with neat diagram	L2	CO3	**10**
		OR			
	b.	Explain the concept of Service-Oriented Architecture (SOA) and how it differs from traditional software architectures. Discuss its significance in modern enterprise resource planning (ERP) systems.	L2	CO3	**10**
10.	**a.**	Discuss the methodology involved in the ERP implementation process and the challenges companies may face during implementation.	L4	CO3	**10**
		OR			
	b.	Explain the different phases of the ASAP implementation methodology. How does this vendor-specific process model contribute to a successful SAP ERP implementation?	L3	CO3	**10**
11.	**a.**	Discuss the bullwhip effect in supply chains and provide examples of how it impacts different levels in the supply chain.	L5	CO3	**10**
		OR			
	b.	Explain how Vendor-Managed Inventory (VMI) and Collaborative Planning, Forecasting, and Replenishment (CPFR) systems improve supply chain performance.	L4	CO3	**10**

12.	**a.**	Analyze the tasks of an SCM system across the strategic, planning, and execution levels. How do these tasks align with supply chain performance management?	L5	CO3	**10**
		OR			
	b.	Discuss the benefits and limitations of using open-source ERP systems compared to proprietary ERP systems, with examples from systems like *ADempiere* and *OpenERP*.	L4	CO3	**10**
13.	**a.**	Elaborate on the vision of *Federated ERP* (FERP) and explain how this approach can address the issues of integration and redundancy in small-to-medium enterprises (SMEs).	L3	CO3	**10**
		OR			
	b.	Discuss the concept of federated ERP systems. How could federated ERP systems potentially address the issue of redundancy in small and medium-sized enterprises running multiple business systems?	L4	CO3	**10**
