FIFTH SEMESTER B.Tech EXAMINATION, DECEMBER-2021

SOFTWARE ENGINEERING

Time: 3 Hours **Maximum Marks: 70**

Instructions:
- **i.** Answer **FIVE** full Questions. Question number 1 and 2 are compulsory. Each question carries 14 marks.
- **ii.** Missing data may be suitably assumed.

1.	**a.**	Describe the various phases in RAD approach.	**07**
	b.	Depict the different software myths with sample scenario.	**07**
2.	**a.**	Explain the distinct steps in requirements engineering process.	**07**
	b.	List out the guiding principles for requirements engineering.	**07**
3.	**a.**	Discuss the three characteristics that serve as a guide for the evaluation of a good design.	**06**
	b.	Identify the basic principles for software design.	**08**
		OR	
4.	**a.**	Depict the principles adapted in data design at the component level.	**07**
	b.	Provide the taxonomy of architectural styles and patterns.	**07**
5.	**a.**	Identify issues to be addressed for successful software testing strategy suggested by Tom Gilb.	**07**
	b.	Illustrate the types of system tests for software-based systems.	**07**
		OR	
6.	**a.**	Describe the different criteria and tests applied for all test phases.	**07**
	b.	Explain the smoke testing benefits applied on complex, time critical software engineering projects.	**07**
7.	**a.**	Indicate the possible steps taken by project management to mitigate risk for reducing turnover.	**07**
	b.	Explain the various components of the cost of quality.	**07**
		OR	
8.	**a.**	Identify the guidelines for formal technical reviews.	**08**
	b.	List the activities are performed by an independent SQA.	**06**
