FIFTH SEMESTER B.Tech EXAMINATION, DECEMBER–2021

PROGRAMMING IN JAVA

Time:3 Hours **Maximum Marks:70**

Instructions:
i. Answer **FIVE** full Questions. Question number 1 and 2 are compulsory. Each question carries 14 marks.
ii. Missing data may be suitably assumed.

1.	**a.**	Elucidate the features of JAVA.	**07**
	b.	Along with examples illustrate the unsigned right shift (>>>) operator and short circuit logical operators.	**07**
2.	**a.**	Write a java program to perform the following: **i.** Sort an array. **ii.** Determine the highest value in an array.	**08**
	b.	Define Inheritance? With an example, demonstrate how multiple inheritance can be achieved.	**06**
3.	**a.**	Write a Java program to illustrate the working of nested try blocks with example.	**06**
	b.	Briefly discus about **i.** Finally block. **ii.** Throw clause.	**08**
		OR	
4.	**a.**	Create a try block that is likely to generate three types of exception and incorporate necessary catch blocks to catch and handle them.	**07**
	b.	Demonstrate the importance of using streams in java.	**07**
5.	**a.**	Define applet? Explain in detail about Applet Life Cycle.	**08**
	b.	Develop an Applet that contains Radio Buttons and also demonstrate Status Message in Applet.	**06**
		OR	
6.	**a.**	Demonstrate getDocumentbase() and getCodebase() using Applet.	**07**
	b.	Demonstrate parameters passing using Applet.	**07**
7.	**a.**	Differentiate AWT and swings. Write a program to add different types of Buttons in JApplet.	**06**
	b.	Elucidate the different JDBC drivers.	**08**

OR

8.	**a.**	Create an application to demonstrate JTable.	**07**
	b.	Develop a JDBC application to display the current contents of a table.	**07**
