SIXTH SEMESTER B.TECH EXAMINATION, JUNE-2019

CLOUD TECHNOLOGY

Time: 3 Hours **Maximum Marks:70**

Instructions: Answer any five full questions selecting atleast two from each part.

PART - A

1. a. How cloud computing differs from regular cloud infrastructure? Discuss the essential characteristics of cloud computing. 08

   b. An examination authority has its web portal for enrolling for the examination and distributing hall tickets and the declaring of the result. The traffic at the web portal is varying between peak loads and no load during the off season. What type of infrastructure would you suggest for the exam authority to subscribe? Justify your decision. 06

2. a. Discuss the importance of SLAs. What are essentials of SLAs and who are the stakeholders for SLAs? 08

   b. Software startup company would like to subscribe to cloud services for maintaining its web portal and also providing a platform to its employees for software development. Explain the types of cloud services the company would like to subscribe. Justify the decision. 06

3. a. Compare the different cloud service models and deployment models. Describe the scenarios in which each could be appropriate. 08

   b. Discuss various service models available from Amazon and Microsoft for IaaS, PaaS and SaaS. 06

4. a. Discuss the incident management process in an IT organization with a neat diagram during migration of application to cloud. 08

   b. List the best practices for negotiating a cloud service contract. 06

PART - B

5. a. State the automated provisioning expected from a cloud service and benefits of automated resource provisioning over traditional resource provisioning. 08

   b. Examine various risks involved with migration of an enterprise application to cloud. 06

6. a. Discuss the performance metrics of cloud used for monitoring. 08

   b. What are the steps taken for Continual Process Improvement processes? 06

JAIN (Deemed-to-be University) Learning Resource Centre Jain Global Campus Ramanagar-112

7.	a.	State the areas covered by security standard OSA and PCI –DSS and its application.	08
	b.	Discuss common security risks and ways of mitigation.	06
8.	a.	Enumerate the legal risks should be considered by organizations considering adopting cloud services.	08
	b.	Compliance is the responsibility of the organization, not the cloud service provider. Software license management, backups, and patch management duties may all be transferred to a cloud service provider to reduce administrative overhead. Justify.	06
