SIXTH SEMESTER BE/B.TECH EXAMINATION, JUNE – 2016

OBJECT ORIENTED ANALYSIS AND DESIGN

Time:3 Hours Maximum Marks:70

Instructions: Answer any **FIVE** full Questions.

1.	a.	what is OOSD? Why object orientation is needed?	06
	b.	Explain the use of following OO-concepts:	
		i. Class	
		ii. Class hierarchy	
		iii. Inheritance	
		iv. Polymorphism	08
2.	a.	Explain Rum Baugh's OMT for OOSD.	06
	b.	What are frameworks? How are they different from design patterns?	04
	c.	What is objectory? Explain the different models used in objectory.	04
3.	a.	What is model? Discuss the benefits of modelling in OOSD.	04
	b.	What are use case diagrams? With a neat diagram explain the use case diagram for help desk.	05
	c.	What are sequence diagrams? Explain the sequence diagram for telephone call.	05
4.	a.	With a diagram, explain the activities involved in an ATM transaction.	04
	b.	Explain the common class patterns used in OO-analysis.	06
	c.	Design and explain sequence diagram for invalid PIN use case.	04
5.	a.	What are relationships? Explain the different types of relationships among objects.	10
	b.	How do you eliminate unnecessary associations?	04
6.	a.	Explain O-O design axioms and corrolaries.	08
	b.	What is client-server architecture? Explain its different forms.	06
7.	a.	Discuss the major activities of designing view layer.	07
	b.	List the guidelines for using colors.	03
	c.	How do you make users in control of the software?	04
8.	a.	Explain different testing strategies.	07
	b.	What is test plan? Give the steps needed to create a test plan.	04
	c.	What is the impact of object orientations on testing? Explain.	03
