SEVENTH SEMESTER B.E EXAMINATION, DECEMBER -2015

AIR POLLUTION AND CONTROL

Time:3 Hours **Maximum Marks:70**

Instructions: 1. Answer Any Five Questions

2. Missing data if any may be assumed suitably.

1.	a.	Define particulate matter, and classify the same and explain briefly.	07
	b.	Explain smog formation in Air, with help of necessary Equations.	07
2.	a.	List the important meteorological parameters that influence air pollution. Briefly discuss the secondary parameters.	07
	b.	Define plume behavior. Explain any three types of plume behavior.	07
3.	a.	Discuss the operational problems in Cyclones.	07
	b.	Discuss the advantages and disadvantages of Cyclones.	07
4.	a.	List the principle of Electrostatic precipitator. Explain any five components of Electro-static precipitators.	07
	b.	List the advantages and Disadvantages of electrostatic precipitators.	07
5.	a.	With the aid of neat sketch Explain venturi scrubber.	07
	b.	Explain various types of absorption equipment's with their merits and demerits.	07
6.	a.	Discuss the regenerative and non-regenerative types of carbon adsorption systems.	07
	b.	Classify incinerators and discuss the catalytic incinerator.	07
7.	a.	Discuss the operational Issues of Bio filter.	07
	b.	Define Bio filtration and classify bio filters. Give brief Explanation on each.	07
8.	a.	Explain the techniques available for noise control at source.	07
	b.	Discuss on noise pollution control by legislations available in India.	07
