SEVENTH SEMESTER B.Tech EXAMINATION, DECEMBER-2021

UI AND UX FUNDAMENTALS

Time: 3 Hours **Maximum Marks: 70**

Instructions:
i. Answer **FIVE** full Questions. Question number 1 and 2 are compulsory. Each question carries 14 marks.
ii. Missing data may be suitably assumed.

1.	**a.**	Briefly explain how Fitt's Law will help in increasing the speed and accuracy of movement in designing of interactive system.	**06**
	b.	Explain three state model for tracking the behavior of input device.	**08**
2.	**a**	Describe how different stages of software development life cycle will help in designing a better software application.	**08**
	b	What is false understanding? Explain different types of false understanding.	**06**
3.	**a**	FORM FILL-IN is a mean for interactive system to ask data or information from users. Explain the Form fill-in design guidelines.	**06**
	b	Explain the role of Manipulative gestures system in Mobile UI design.	**08**
		OR	
4.	**a**	How Time/space four-quadrant matrix model for group supported work will enhance the interaction?	**06**
	b	What are semaphoric gestures? Explain with examples, static and dynamic semaphoric gestures.	**08**
5.	**a**	Explain the features of prototyping tool pixate.	**07**
	b	Give a brief description on any two UX tools available for organizing the information.	**07**
		OR	
6.	**a**	Highlight the features available with Google Material Design.	**07**
	b	Briefly describe any two UX tools useful for user research and user testing.	**07**
7.	**a**	What are the three focus areas to be concentrated while dealing with Blind user experiencing the internet also highlight the key points in ongoing research?	**14**
		OR	
8.	**a**	What are the advantages of designing mobile applications for multiple form factors? Summarize the observations in Trutap Version 1.	**14**
