[12CS/IS74]

SEVENTH SEMESTER B.E EXAMINATION DECEMBER–2015

CLOUD COMPUTING

Time:3 Hours **Maximum Marks:70**

Instruction: Answer any **FIVE** full Questions.

1.	a.	What are the benefits of cloud computing? Explain.	06
	b.	With a neat diagram explain the different components of cloud computing.	08
2.	a.	Explain the different cloud deployment models.	08
	b.	List the requirement for building cloud infrastructure.	06
3.	a.	Describe the web application hosting cloud architecture for public cloud.	10
	b.	Write short notes on web apps.	04
4.	a.	Discuss cloud computing best practices.	06
	b.	List the key benefits of using software – plus – services.	04
	c.	Write the steps of migration into the cloud.	04
5.	a.	What are the benefits of virtualization?	05
	b.	What is hypervisor? Define different types of hypervisor in cloud computing.	04
	c.	Write the iterative steps involved in capacity planning w.r.t. cloud computing.	05
6.	a.	What are the six different stages in life cycle of cloud services?	06
	b.	Discuss the key mechanisms for protecting data.	04
	c.	Mention the steps of authentication procedure in OPENIDL	04
7.	a.	Discuss services of any five managed cloud storage providers.	05
	b.	Categorize different backup types used in cloud backup solutions.	06
	c.	Write short notes on cloud storage interoperability.	03
8.	a.	List the properties necessary to guarantee a reliable transaction in databases and applications of cloud.	04
	b.	List and explain first and second level application attributes which should be considered in the analysis of applications suitability to be ported to the cloud.	10
