06

Reg. No. | | | | | | | | | | | [12EC71]

SEVENTH SEMESTER B.E EXAMINATION, DECEMBER - 2015
COMPUTER COMMUNICATION NETWORKS

Time:3 Hours **Maximum Marks:70**

Instructions: Answer any **FIVE** full Questions.

1. a. Explain the LAN and point to point WAN with a neat diagram. **06**

   b. Explain the layered architecture with and OSI reference model with a neat diagram. **08**

2. a. Write the advantages and disadvantages of optical fiber as communication media. **06**

   b. Explain the uploading and downloading in 56K modem with neat diagrams. **08**

3. a. Explain the stop and wait algorithm with a neat algorithm and flow diagram. **08**

   b. Explain the different HDLC frame formats. **06**

4. a. A pure ALOHA networks transmits 200 bit frames on a shared channel of 200kbps. What is the throughput if the system produces **06**

      i. 1000 frames per second

      ii. 500 frames per second

      iii. 250 frames per second.

   b. Explain the concept of VLAN with a neat diagram. **08**

5. a. Explain the two different methods of delivery in a network layer for delivering packets to its final destination. **06**

   b. Explain the concept of transmission from IP_V4 to IP_V6 **08**

6. a. Explain the formation of shortest path tree for the given topology. **08**
