[12CS8406]

EIGHTH SEMESTER B.E EXAMINATION, JUNE - 2016

C # & .NET CONCEPTS

Time: 3 Hours **Maximum Marks: 70**

Instructions:

1. Answer any **FIVE** full Questions.
2. Missing data may be suitably assumed.

1.	a.	Explain the platform independent nature of .Net.	04
	b.	Write a simple C# program and explain each component of the program.	04
	c.	Explain .Net assemblies in detail.	06
2.	a.	With example explain the C# System Data types.	07
	b.	Write a program to demonstrate value types and reference types.	07
3.	a.	Explain how encapsulation is achieved in C# with an example.	07
	b.	Write a C# program for Containment/Delegation and explain its importance.	07
4.	a.	What are exceptions? How does .Net handles exception ? Explain with an example.	09
	b.	Explain in detail what happens for undhandled exception in .Net.	05
5.	a.	How does garbage collection works in C#? Write program to demonstrate System.GC().	06
	b.	Write a program to for building finalizable and disposable types.	08
6.	a.	Write a program to demonstrate:	
		i. Interface as parameters	04
		ii. Interface as return types	04
	b.	Write a program to build Enumerable types in C# and explain its importance.	06
7.	a.	Write a simplest delegate example and explain.	06
	b.	Explain the difference between .Net delegates and Events.	03
	c.	Write a simple program to demonstrate the importance of Lambda expressions.	05
8.	a.	Write the steps to for programmatically creating user threads.	05
	b.	Explain how concurrency issue can be solved in C#.	04
	c.	Write a program to demonstrate timer callbacks.	05
