[21MSCH3S04]

THIRD SEMESTER UNIVERSITY EXAMINATION, NOVEMBER 2022

PHARMACEUTICAL AND INDUSTRIAL CHEMISTRY

Time: 03 HOURS **Maximum Marks: 50**

SECTION – A

1. Answer any FOUR of the following questions. **4×5=20**

a. Write a note on the indirect methods for pharmacophore identification.

b. Briefly outline the drug discovery process.

c. Explain the synthesis and structure activity relationship of sulphonamide.

d. What are the cardiovascular drugs? Write a note on amyl nitrite.

e. Write the structures and application of the allethrin and cypermethrin.

SECTION – B

2. Answer any TWO of the following questions. **2×9=18**

a. Discuss the synthesis and applications of the crystal violet.

b. Explain:

i. Emulsion polymerization and its advantages.

ii. Solution polymerization and its limitations.

c. Discuss the biotic and abiotic origin of petroleum.

SECTION – C

3. Answer the following question. **12 Marks**

a. i. Explain the synthesis of DDT and discuss the mode of action.

ii. Write a note on the alkyd, epoxy and polyurethane resins.

iii. What are the phenol-formaldehyde resins? Discuss the preparation method.
