[22MSCH3H03]

THIRD SEMESTER UNIVERSITY EXAMINATION, NOVEMBER 2023

PHARMACEUTICAL AND INDUSTRIAL CHEMISTRY

Time: 03 HOURS **Maximum Marks: 50**

SECTION – A

1. Answer any FOUR of the following questions. 4×5=20

a. What is a drug? Explain the qualities of a drug.

b. Explain the synthesis and structure activity relationship of sulphonamide.

c. What are pheromones? Give examples.

d. What are optical brighteners? How does they work?

e. Explain the characteristics of jet fuel.

SECTION – B

2. Answer any TWO of the following questions. 2×9=18

a. Explain the mode of action of carbamate insecticides.

b. Write a note on urea-formaldehyde and its applications.

c. i. Discuss the radical addition and radical decomposition reactions.

ii. Explain the characteristics of fluid catalytic cracking.

SECTION – C

3. Answer the following question. 12

a. i. Differentiate between basic concepts of analogues and prodrugs with examples of parent drug molecule(s).

ii. Discuss the structure activity relationship, side effects and mode of action of sulpha drugs.

iii. Discuss the constitution and classifications of dyes.
