[18MTCS242]

SECOND SEMESTER M.TECH EXAMINATION, JUNE 2019

END POINT SECURITY MANAGEMENT

Time: 03 Hours **Maximum Marks:100**

Instructions:
- **i. Answer FIVE full questions. Question No. 1 and 2 are compulsory.**
- **ii. Draw neat sketches wherever necessary.**
- **iii. Make suitable assumptions wherever necessary.**

1. a. Define End Point Security and elaborate four tenets of it. **08**

b. Consider that your organization has four categories of employee **12**

- **i.** Manger/Director Level
- **ii.** Associate Level
- **iii.** Assistant Level
- **iv.** Entry Level, and they all have access to their local ERP System, now apply the Principle of Least Privilege (PoLP) and state the final privileges of the employees accordingly.

2. a. Illustrate endpoint anomaly detection. **08**

b. Consider that you are working as a SOC Analyst and you have to monitor the whole network using any of the SIEM tool, So first state which tool will you prefer and why? Based on the access logs of the tool state the signatures of different threats/attacks such as DoS, Malware and Worm. **12**

3. a. In the practical sense define file encryption key retrieval? Is there any better solution available for the same, if yes? Explain in detail. **08**

b. Suppose your company is using Symantec antivirus or any other endpoint responders (EDRs), which ports will you consider or the software will suggest you as a secure port and why? **12**

OR

4. a. Based on the available tools in the market, draw a block diagram and explain the Endpoint Security Life Cycle. **08**

b. Define suitable policies and implementation measures including trustworthy network. **12**

5. a. Define secure browsing and its importance. **08**

b. State the difference between Vulnerability, Threat, and Risk and illustrate how you will prepare threat profile for your organization. **12**

OR

JAIN (Deemed-to-be University) Learning Resource Centre Jain Global Campus Ramanagar-112

6. a. Suppose you are working in an organization as an security constrain and detect n number of attacks a day, so how you will identify the nature and impact of an attack. **08**

b. State the process of handling the malware. **12**

7. a. Narrate the concept of Endpoint Network Access Control. **08**

b. Suppose you are in the team of Network Operation Center, your duty is to monitor network traffic carefully and report the vulnerability or any misbehavior you suspected. So in this case which tool will you suggest to use to monitor bandwidth, peak demand, and unexpected surges on network loads during distributed internal and external attacks? **12**

OR

8. a. Discuss the concept of SIEM, SIEM tools available in the market, which one do you prefer and why? **10**

b. Write a short note on the concept of Network Self-healing. **10**
