SECOND SEMESTER M.TECH EXAMINATION, JUNE 2019

SECURITY AND PRIVACY FOR BIG DATA ANALYTICS

Time: 03 Hours **Maximum Marks: 100**

Instructions: **i. Answer FIVE full questions. Question No. 1 and 2 are compulsory.**
ii. Draw neat sketches wherever necessary.
iii. Make suitable assumptions wherever necessary.

1.	**a.**	Define Dynamic biometric. Discuss any 4 Dynamic biometric methods based on capturing behaviourisms or expressions of the authenticated person in the given period of time.	**10**
	b.	Define security controls in big data and List out top 5 security risks in big data. Briefly explain about threats modeling and attack trees.	**10**
2.	**a.**	What is privacy? Why is it important? Discuss MapReduce, HDFS,Pig vs. SQL, Zookeeper.	**10**
	b.	Briefly explain Hadoop Ecosystem in big data analytics.	**10**
3.	**a.**	Briefly explain about Personally identifiable information (PII) how is it related to security.	**10**
	b.	Demonstrate privacy taxonomy in big data analytics.	**10**
		OR	
4.	**a.**	Explain Possible ways to compromise the big data? Bring out ways to prevent data security breaches.	**10**
	b.	Discuss the Role and impact of big data analytics on privacy with examples.	**10**
5.	**a.**	Illustrate limitations of cyber investigation and digital forensics. Explain effective Combats against cybercrime with example.	**10**
	b.	Discuss briefly about analysis of digital evidence. Explain possible places where Digital evidence found.	**10**
		OR	
6.	**a.**	Illustrate cardinal rules of computer forensics. Briefly explain the analysis of digital evidence and digital evidence methodology.	**10**
	b.	Define digital evidence. Demonstrate digital evidence management Combating Cybercrimes- Law & Enforcement in India.	**10**
7.	**a.**	Briefly discuss and demonstrate information technology act 2008(IT ACT 2008).	**10**
	b.	Explain cyber acts and role of cyber law in India. Discuss briefly about computer forensic investigation procedure.	**10**
		OR	
8.	**a.**	Demonstrate Top 10 big data security and privacy challenges. Impact of big data analytics on security with examples.	**10**
	b.	Define and explain Metadata preservation, Hadoop Forensic, evidence ecosystem, cyber security policies.	**10**
