SECOND SEMESTER M.TECH EXAMINATION, JUNE – 2019

INTERNET OF THINGS

Time: 03 Hours **Maximum Marks: 100**

Instructions:

1. Answer **FIVE** full Questions. Question1 and Question2 are compulsory.
2. Missing data may be suitably assumed.

1.	**a.**	What is meant by M2M communication? Also write the difference between IoT and M2M communication.	**10**
	b.	Describe in detail IoT architecture with necessary diagrams.	**10**
2.	**a.**	Write short notes on sensor data communication protocols.	**10**
	b.	List the signals in serial bus UART, I2C and CAN protocols. Mention their importance.	**10**
3.	**a.**	What is RFID? Elaborate in detail about RFID with respect to IoT applications.	**10**
	b.	Describe embedded computing with necessary examples.	**10**
		OR	
4.	**a.**	Define Actuator. Explain how the actuators are used in IoT with necessary examples.	**10**
	b.	Describe in detail about the embedded platforms for prototyping with necessary example.	**10**
5.	**a.**	Explain the usage of Raspherry Pi, Aurdino and BeagleBone in IoT.	**10**
	b.	What are the APIs effectively involved in prototyping. Explain them in detail.	**10**
		OR	
6.	**a.**	List out the softwares used in IoT. Explain any two of them in detail.	**10**
	b.	Explain in detail about the services in software development.	**10**
7.	**a.**	What are the security model profiles and protocols for the IoT?	**10**
	b.	List out the security requirements and threats involved in IoT based system developments.	**10**
		OR	
8.	**a.**	Describe the data flow diagram and domain architecture reference model for smart city applications.	**10**
	b.	Write short notes on :	
		i. Business Models	**05**
		ii. Business Model Innovation.	**05**
